

GD Bildung und Kultur

Programm für lebenslanges Lernen

Here we are: The *HHUG*, 23 students of the Hans-Böckler vocational college in Oberhausen.

*We'd love to introduce ourselves to you. In the following presentation we will tell you something about:*

- facts and figures*
- our lives outside school*
- our attitudes towards life*
- our hopes and fears for future*
- what we expect from the exchange*

# Our Ladies

# The Boys

All together we are the HHUG of the HBBK

# Our lives outside school

- What some of us are doing to recover from hard working days at school.....

## KUNSTRADFAHREN

➤ tricks on and with a bike,  
for example:

- standing on the bicycle seat or on the handlebar
- jumping from the seat to the handlebar, while the bike is rolling
- at tournaments the artists have five minutes to show their tricks

# Kunstradfahren

# Music

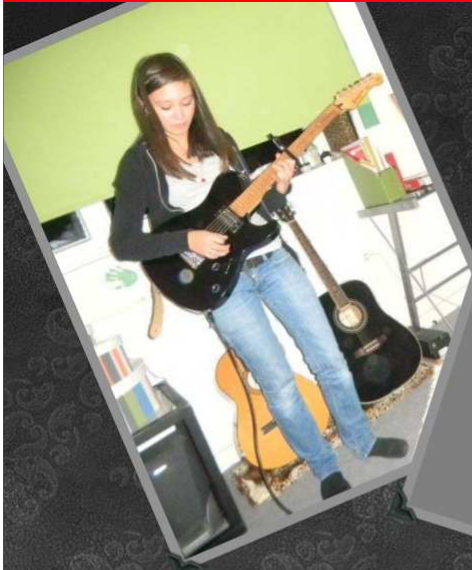

➤ We are used to playing ...

... Charts-Music

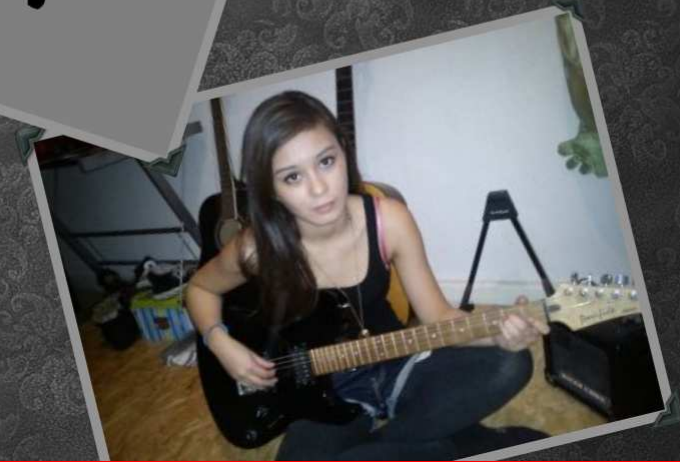

... Rock 'n' Roll

... R'nB

with the guitar, but only some of us play in a band.

*Musik*

## Horseback-Riding

➤ Riding our own horses is the most fun, but we also take care of them:

- clean the horse-stable,
- give the horse its food,
- clean the horse

## My life with a child

- I'm 22 years
- My son Noa-Miguel is 3 years old
- No time for hobbies or anything else
- My life is not boring, but full of fun
- I gain experience for life

Mother

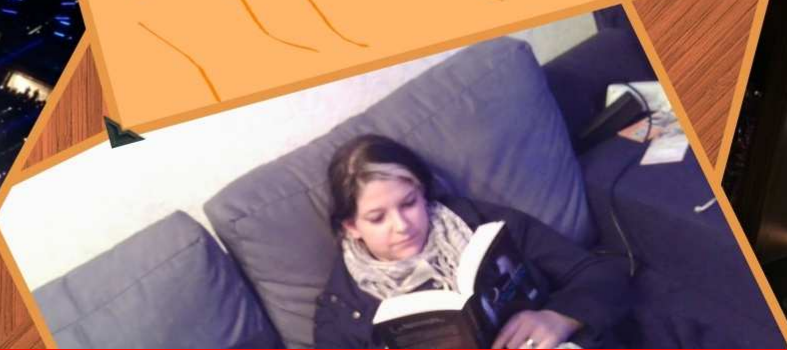

## Our freetime with our friends

- We don't make plans
- good weather: go out with friends
- bad weather: we do other things
  - ... reading a book at home
  - ... listening to music
  - ... spending time with the dog
- weekend: going to work or to the gym and spending time with our friends or families

*Freetime*

## FOOTBALL

- Some of us play for different clubs:
  - ... "Blau-Weiß-Oberhausen"
  - ... "Arminia Lirich"
  - ... "Arminia Klosterhardt"
- The others play just for fun with their friends.
- They meet and play outside everywhere.

# Hopes and Fears.....

- Pollution
- Diseases
- Unemployment
- Growing Social Gap
- Separation of Families

# Pollution

- Emissions damage environment.
- In the past: many factories and coal mines (smog and coal-dust)
- But that has changed in the last 20 years with the structural changes.

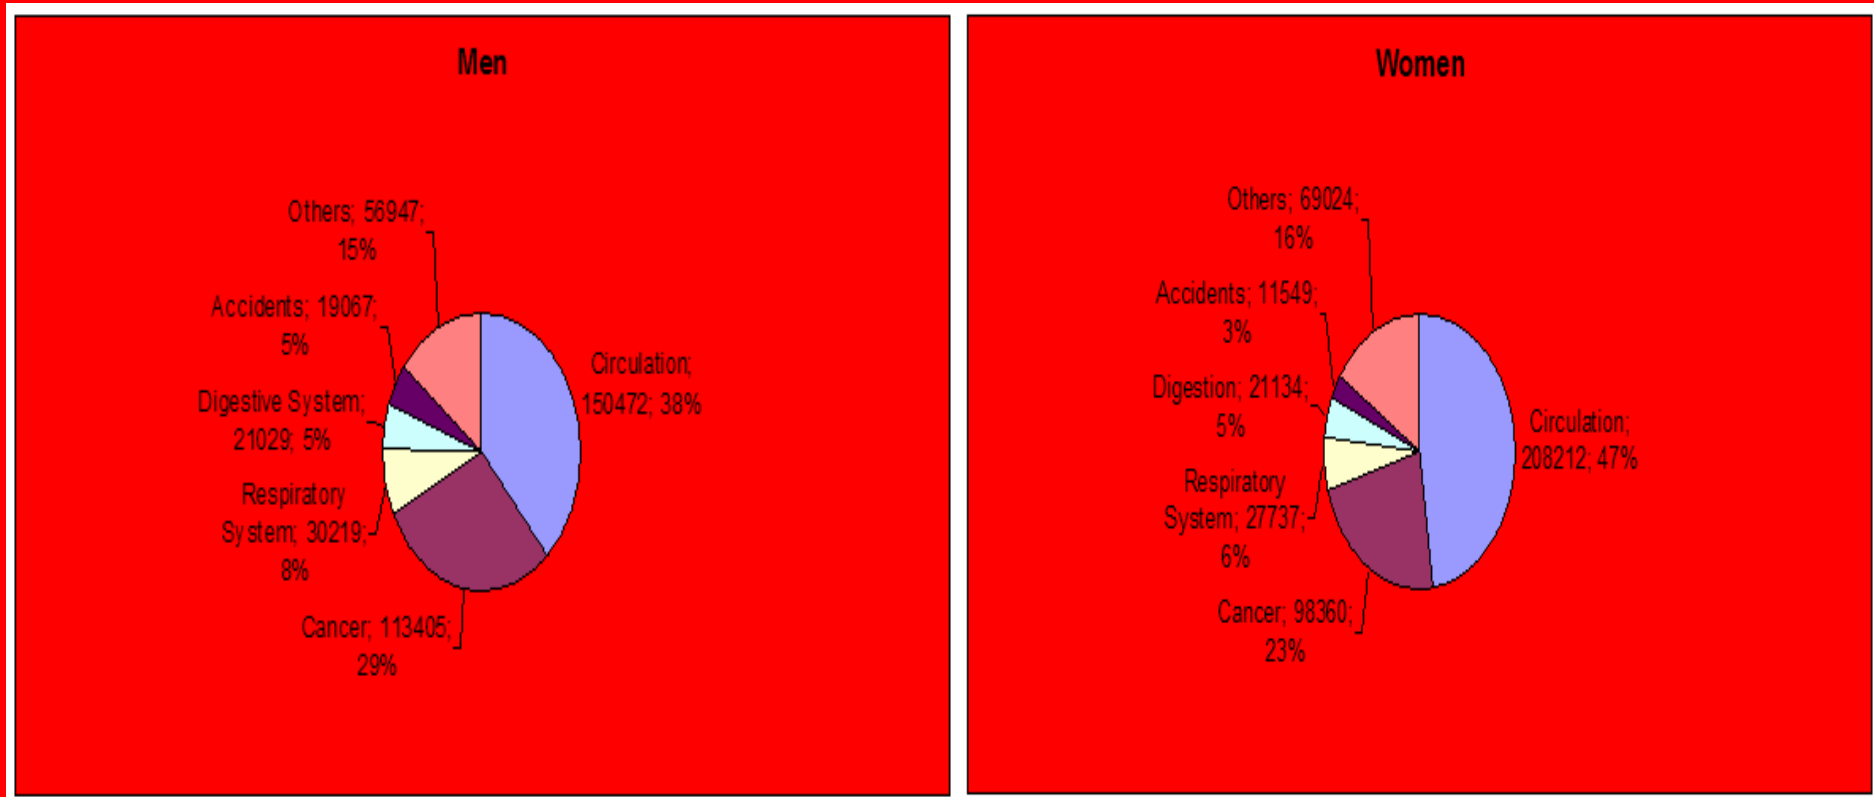

# Pollution

- Cars in more and more cities have to carry environmental badges.
- In the future only cars with the green badge will be allowed to go everywhere in a few years.

# Diseases

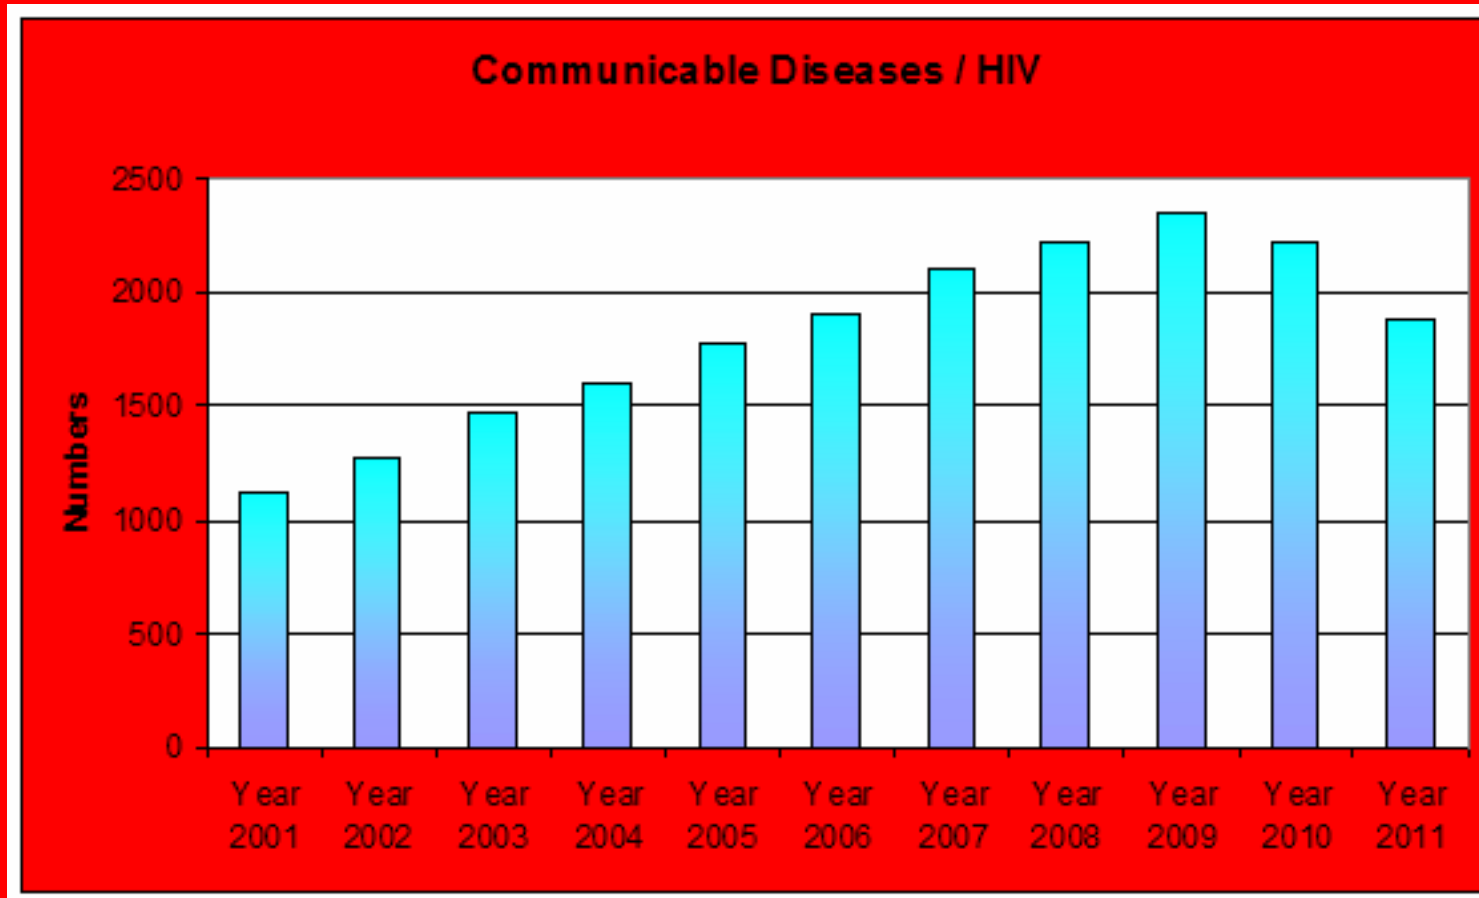

Here you can see the most common causes of death in Germany in 2007

**What we hope is to stay healthy, at least we are trying to do what we can..... just a cigarette from time to time ☺.**

# Communicable Diseases/HIV

(source: <http://www.vergissaidsnicht.de/fakten.html>)

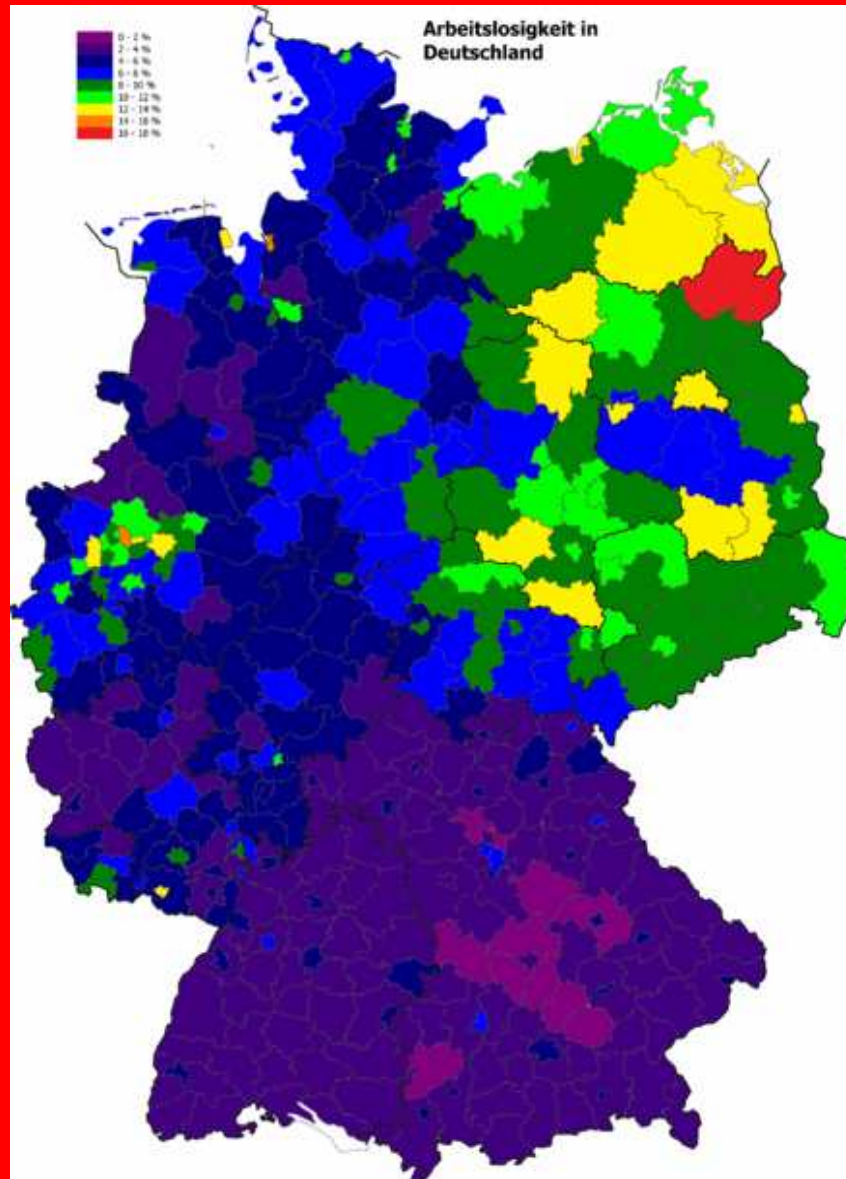

**Numbers of new infections have risen until 2009, people seemed to have forgotten about the risk....**

# Communicable Diseases/HIV

- **ways of infection:**
  - **high risk: unprotected sex**
  - **mother to child (risk: 10-40%)**
  - **low risk:**
    - **Blood transfusion: 0.0001%**
    - **Needle: 0.3%**
    - **sexual practices, but only when there is no contact with blood, semen, etc.**

# Unemployment

Not to get a job is one of our major fears:

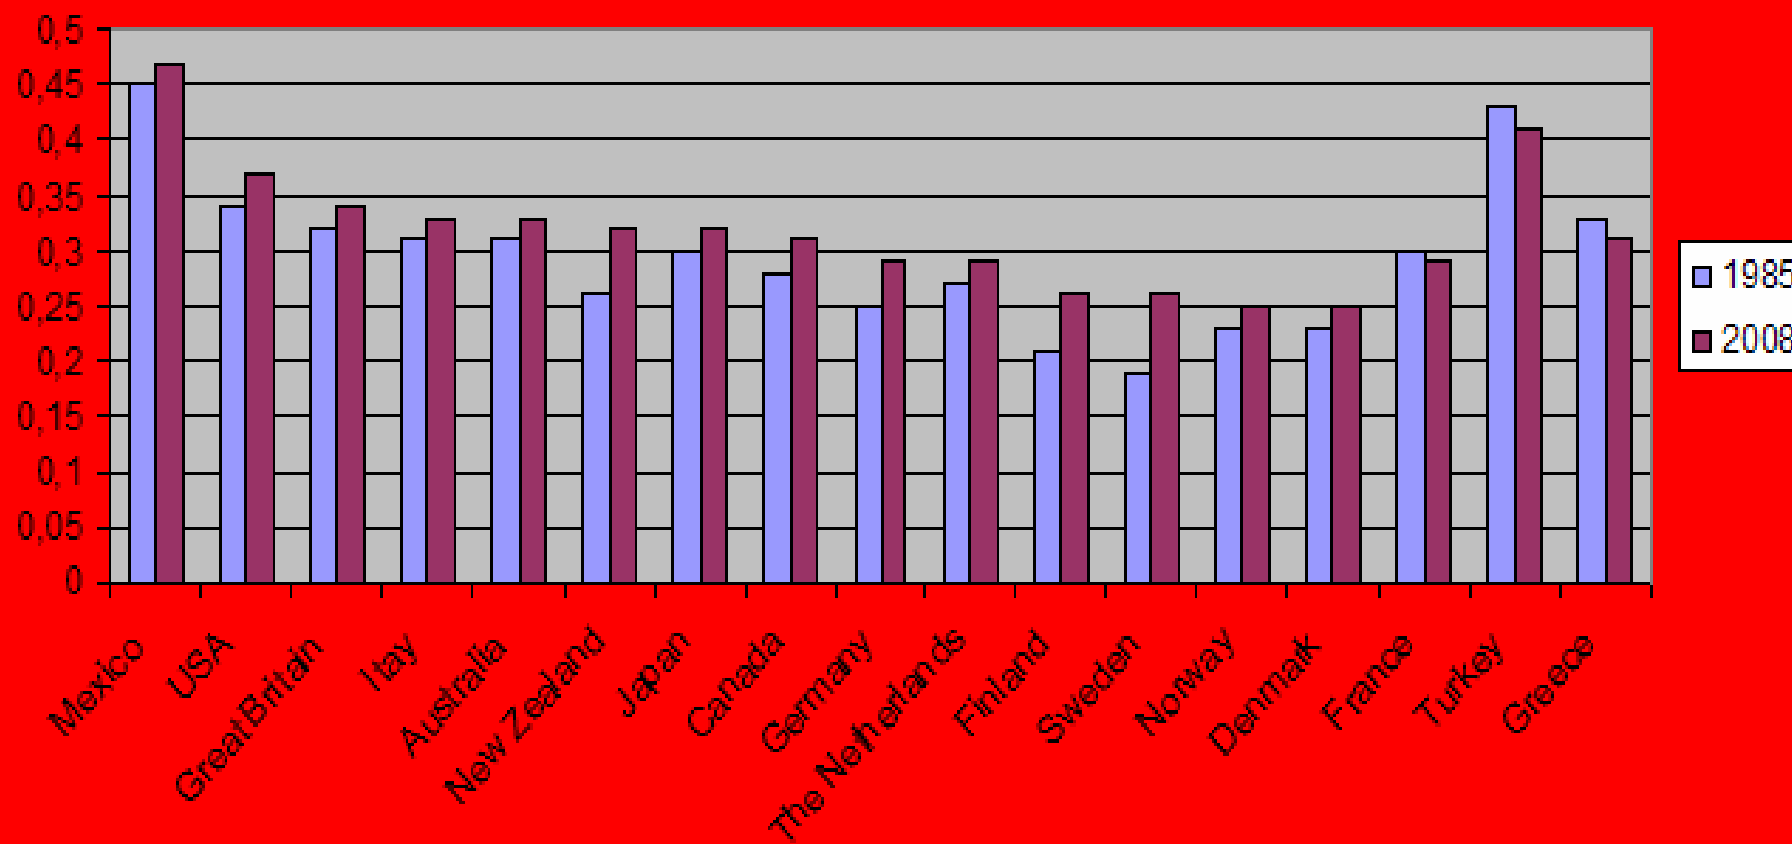

Blue and violet: low rates 0% - 4%

Red: highest rate (16 - 18% )

Yellow and green: medium rates, e.g. Oberhausen has got 11.5%.

## The Growing Social Gap

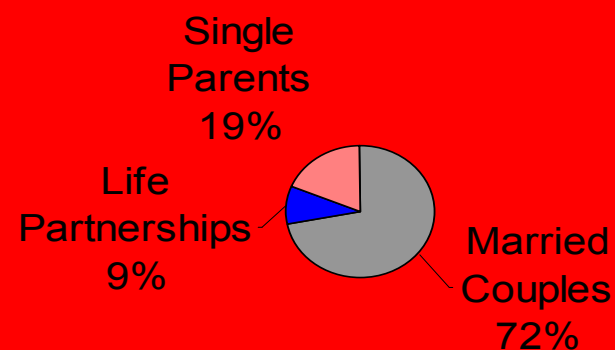

(source: OECD Database on Household Income Distribution and Poverty)

# Separation of Families or Partnerships

- In 2011: 11 out of 1000 married couples divorced, that is about 190.000!
- Almost 60% of them had children under 18 years.
  
- About 70% of parents in Germany are married
- Almost 30% are not married or are educating their children without a partner
- In big cities every 3rd child is brought up only by one parent, mostly the mother.
